

DAYANANDA SAGAR COLLEGE OF ENGINEERING
DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

16 HOUR HACKATHON

It's not about the ideas, but it's about making those ideas happen!

We, the Dept. of Computer Science & Engineering, invite you on a quest for innovation, a challenge to make ideas happen and a competition for the smartest of the lot.

The renowned **16 Hour Hackathon** of DSCE is back for its second innings, and with the popular demand from last year, we have made this year's event a lot more tempting for you to say yes to. It's going to be 16 hours worth of developing your idea, eating scrumptious food, enjoying the entertainment and socializing with the most insomniac people in campus!

What are the rules?

1. Each team can have **2-4 people** and entry fee is **₹ 0 per person**.
2. It's an **open themed** hackathon, so be as creative as possible.
3. If you want to work on hardware projects, we request you to get your own apparatus.
4. We expect all of your code to be written on the day of the Hackathon, no half-baked projects.
5. We will provide you with internet facility, but please try to bring your own hotspot if possible.

When & Where?

The hackathon will take place at the **3rd Floor of Computer Science Dept.** on **14th April 2017 at 5 PM, Friday** and will end exactly 16 hours later on 15th April 2017. So get your sleeping bags in for those who can't afford to miss their beauty sleep.

Where do I sign up?

You can pay & register for the hackathon from **Tuesday, 11th April 2017 - 1:15 PM onwards** at the **3rd Floor of Computer Science Dept.** where you will find **Rohan Kumar (8792414258)** or **Kavya MG (8050255415)**.

But hurry up, cause we're going to be accepting only the first 40 teams to register.

But wait... I have some more questions!

You can always call the co-ordinators, **Darshan N (9742934099)** and **Raja Rajan A (9845336113)** with any queries you might have with the Hackathon. The folks at the CS Dept. are also ready to help at all times.

Good luck!
