

USER AWARENESS

The library takes an active part in the orientation programme for the benefit of new students in the beginning of academic year. They are taken around the library to familiarize them with various resources and services available in the Library. Training sessions are also organized whenever a new product or service is introduced.

Any user desiring to know more about library resources and service or to learn how to use a particular resource like OPAC, e-journals, databases etc. should contact any library Staff Members or at Information Desk.
