## **9. Our children are very small (from KG to 3<sup>rd</sup> std), We are afraid of infection. Can we send them to the school for the next year by skipping this year class?**

- This is a wrong perception/idea. Nearly 70% of the brain growth takes place between the age of 2 ½ & 8 years. Education is not only about writing and reading. It is also about learning socialization, Security, Diversity, Responsibility, Self-sufficiency, Good manners, Activity, Flourishing imagination of students, Regularity Discipline etc., Formation of Aptitudes and Attitudes of children happens only during this period. Therefore missing a school year is a completely misplaced concept and therefore needs to be discouraged tooth and nail.
