3rd SEMESTER

**Government of Karnataka
DEPARTMENT OF TECHNICAL EDUCATION**

Programme	Mechanical Engineering	Semester	III
Course Code	20ME31P	Type of Course	Programme Core
Course Name	Mechanics of Materials	Contact Hours	8 hours/week 104 hours/semester
Teaching Scheme	L:T:P :: 3:1:4	Credits	6
CIE Marks	60	SEE Marks	40

1. Rationale

In this course, Diploma engineers are required to analyse the reasons for failure of components and select the suitable materials for a given applications. For this purpose, it is essential to study the concepts, principles, applications and practices covering stress, strain, stress concentration, weak points, deformations, bending moment and shearing force. The students will also study the basic principles of Finite Elements Analysis and perform stress strain analysis using Ansys software to understand and quantify the effects of real-world conditions on a part. These simulations, will allow Diploma engineers to locate potential problems in a design, including areas of tension and weak spots. FEA becomes a tremendous productivity tool, helping engineers in reducing product development time and cost. Hence, FEA is introduced in this course. It is expected that efforts will be made to provide appropriate learning experiences in the use of basic principles to the solution of applied problems and to develop the required skill and competencies

2. Course Outcomes: At the end of the Course, the student will be able to:

CO-01	Analyse Simple Stresses and Strains on given Structural member that is subjected to Tensile, Compressive and Shear loads by using Destructive Test.
CO-02	Draw Shear force Diagram (SFD) and Bending moment Diagram (BMD) and Also, Analyse Bending Stresses in a Beam using Finite element methods(FEM) software
CO-03	Demonstrate the application of finite element formulations to solve both One dimensional and Two dimensional Problems.
CO-04	Demonstrate the application of FEM software for Validation of both One dimensional and Two dimensional Problems

3. Course Content

Week	CO	PO*	Lecture (Knowledge)	Tutorial (Activity)	Practice (Skill)
			3 hours/week	1 hour/week	4 hours/week (2 hours/batch twice in a week)
1	01	01	1. Introduction to Force-Types of Forces-Resolution of forces	Refer Table 1	Resolution of forces by Graphical Method
			2. Problems on Resolution of forces- Analytical Method		Verification of Forces by Lami's Theorem
			3. Problems on Resolution of forces- Analytical Method		
2	01	01	1. Types of Loads-Tensile, Compression, Shear, Impact, Stress- Types- Strain- Types- - Hooks Law- Young's Modulus		Conduct Tensile test for the given Specimen and Determine Stress- Strain-Young's Modulus, Yield Stress- Maximum Stress-

			<p>2. Stress - Strain Diagram - Elastic constants- Linear strain, Lateral Strain, Poison's Ratio, Volumetric Strain, Bulk Modulus, Rigidity Modulus , Fatigue - Endurance Limit</p> <p>3. Stress concentration, Factor of Safety(FOS), Concept of Temperature stresses</p>	Refer Table 1	<p>Breaking Stress- % Elongation in Length and % Reduction in Area</p> <p>Also, Draw Stress- Strain Diagram for the above Parameters</p>
3	01	01	<p>1. Simple Problems on Stress, Strain and Elastic constants</p> <p>2.. Simple Problems on Stress, Strain and Elastic constants</p> <p>3. Simple Problems on Stress, Strain and Elastic constants</p>	Refer Table 1	<p>Conduct Compression test for the given Specimen and Determine Stress- Strain- Young's Modulus, Yield Stress- Maximum Stress- % Reduction in Length and % Increase in Area</p> <p>Also, Draw Stress- Strain Diagram for the above Parameters</p>
4	01	01	<p>1. Problems on Members subjected to combined Stresses</p> <p>2. Problems on Members subjected to combined Stresses</p> <p>3. Problems on Members subjected to combined Stresses</p>	Refer Table 1	<p>Conduct Shear test for the given specimen</p>
5	02	02	<p>1. Types of Beams-Types of Loads acting on Beams- Concept of Shear force - Bending moment</p> <p>2 Draw Shear force Diagram (SFD) and Bending Moment Diagram (BMD) for Cantilever subjected to Point Load and Uniformly Distributed loads (UDL)</p> <p>3. Draw Shear force Diagram (SFD) and Bending Moment Diagram (BMD) for Cantilever subjected to Point Load and Uniformly Distributed loads (UDL)</p>	Refer Table 1	<p>Conduct Bending test for the given specimen</p>

6	02	02	<p>1. Draw Shear force Diagram (SFD) and Bending Moment Diagram (BMD) for a Simply supported beam subjected to Point Load and Uniformly Distributed loads (UDL)</p> <p>2. Draw SFD and BMD for Simply supported and Cantilever beam subjected to Point Load and UDL Draw Shear force Diagram (SFD) and Bending Moment Diagram (BMD) for a Simply supported beam subjected to Point Load and Uniformly Distributed loads (UDL)</p> <p>3 Draw SFD and BMD for Simply supported and Cantilever beam subjected to Point Load and UDL Draw Shear force Diagram (SFD) and Bending Moment Diagram (BMD) for a Simply supported beam subjected to Point Load and Uniformly Distributed loads (UDL)</p>	Refer Table 1	<p>Present You tube videos in Stress, Strain and Bending Stresses on Different mechanical members</p> <p>Prepare a report on the observations made</p> <p>Eg: https://www.youtube.com/watch?v=C-FEVzI8oe8</p>
7	02	02	<p>1. Pure Bending-Assumptions- Neutral Axis-Bending Equation</p> <p>2. Problems on Bending Equation</p> <p>3. Problems on Bending Equation</p>	Refer Table 1	<p>Present You tube videos in Stress, Strain and Bending Stresses on Different mechanical members</p> <p>Prepare a report on the observations made</p>
8	03,04	01	<p>1. Introduction to Finite Element Methods (FEM), Need-Back Ground</p> <p>2. Methods employed in FEM- Steps in FEM</p> <p>3. Advantages and Disadvantages, Limitations, Applications of FEM-Concept of Discontinuity</p>	Refer Table 1	Practice on FEM software (Eg: Ansys)
9	02,03,04	01,02,04	<p>1. Phases of FEA(Finite Element Analysis)</p> <p>2. Discretization Process</p> <p>3. Meshing –Element type</p>	Refer Table 1	Validate Bending Equation Problems solved in Week 7 using FEM software (Eg: Ansys)
10	02,03,04	01,02,04	<p>1. Stiffness Matrix of a Bar Element</p> <p>2. Global Stiffness Matrix- Properties of stiffness matrix</p>	Refer Table 1	Validate Bending Equation Problems solved in Week 7 using FEM software (Eg: Ansys)

			3. Boundary Conditions- Methods -Types		
11	03,04	02,04,07	Problems on 1-D elements	Study the latest technological changes in this course and present the impact of these changes on industry	Validate using FEM software (Eg: Ansys)
12	03,04	02,04,07	Problems on 1-D elements		Validate using FEM software (Eg: Ansys)
13	03,04	02,04,07	Problems on 2-D elements		Validate using FEM software (Eg: Ansys)
Total in hours			39	13	52

- *PO= Program Outcome as listed and defined in year 1 curriculum
- Course Coordinator must prepare PO - CO mapping with strength (Low/Medium/High) before course planning

TABLE 1: Suggestive Activities for Tutorials: (The List is only shared as an Example and not inclusive of all possible activities of the course. Student and Faculty are encouraged to choose activities that are relevant to the topic and on the availability of such resources at their institution).

Sl. No.	Suggestive Activities for Tutorials
01	Understand Static Equilibrium using common examples, try to apply the principles and demonstrate in class the importance of static equilibrium in daily life, at home or at work.
02	Study the behavior of Aluminum under the action of Tensile/Compression Load. Plot Stress Strain Diagram and Demonstrate in the class the behavior of Aluminum different from that of a Cast Iron.
03	A seesaw is occupied by two children of equal weight "W" N. The center of gravity of each child is x meters from the fulcrum. The length of the board is 3x meters, y mm wide and z mm thick. Determine the maximum bending stress and shear stress in the board.
04	Tapered elastic bar subjected to an applied tensile load P at one end and attached to a fixed support at the other end. The cross-sectional area varies linearly from A_0 at the fixed support at $x = 0$ to $A_0/2$ at $x = L$. Calculate the displacement of the end of the bar (a) by modelling the bar as a single element having cross-sectional area equal to the area of the actual bar at its midpoint along the length, (b) using two bar elements of equal length and similarly evaluating the area at the midpoint of each, and compare to the exact solution By FEM.
05	Identify the type Beam in Traffic Light Post. Determine the displacement field for this beam subjected to UDL throughout its length.
06	Discuss procedure using the commercial package available today for solving problems of FEM. Take a Structural Problem to Demonstrate the same.
07	In 1989, Jason, a research-type submersible with remote TV monitoring capabilities and weighing 35 200 N, was lowered to a depth of 646 m in an effort to send back to the attending surface vessel photographs of a sunken Roman ship offshore from Italy. The submersible was lowered at the end of a hollow steel cable having an area of $452 \times 10^{-6} \text{ m}^2$ and $E = 200 \text{ GPa}$. Determine the extension of the steel cable. Due to the small volume of the entire system, buoyancy may be neglected.
08	Laboratory tests on human teeth indicate that the area effective during chewing is approximately 0.25 cm^2 and that the tooth length is about 1.1 cm. If the applied load in the vertical direction is 880 N and the measured shortening is 0.004 cm, determine Young's modulus.

4. CIE and SEE Assessment Methodologies

Sl. No	Assessment	Test Week	Duration In minutes	Max marks	Conversion
1.	CIE-1 Written Test	5	80	30	Average of three tests 30
2.	CIE-2 Written Test	9	80	30	
3	CIE-3 Written Test	13	80	30	
4.	CIE-4 Skill Test-Practice	6	180	100	Average of two skill test reduced to 20
5	CIE-5 Skill Test-Practice	12	180	100	
6	CIE-6 Portfolio continuous evaluation of Tutorial sessions through Rubrics	1-13		10	10
Total CIE Marks					60
Semester End Examination (Practice)			180	100	40
Total Marks					100

5. Format for CIE written Test

Course Name	Mechanics of Materials	Test	I/II/III	Sem	III
Course Code	20ME31P	Duration	80 Min	Marks	30
Note: Answer any one full question from each section. Each full question carries 10 marks.					
Section	Assessment Questions	Cognitive Levels(R/U/A)	Course Outcome	Marks	
I	1				
	2				
II	3				
	4				
III	5				
	6				
Note for the Course coordinator: Each question may have one, two or three subdivisions. Optional questions in each section carry the same weightage of marks, cognitive level and course outcomes.					

5. (a) For CIE Skill Test -4

Duration :240Min

SL. No.	CO	Particulars/Dimension	Marks
1	01	Verification of Forces by Lami's Theorem <ul style="list-style-type: none"> Finding the resultant of forces - Analytical Method –15 Marks Verification of Forces by Lami's Theorem – Practically-15Marks 	30
2	02	Determine the deformation of a given specimen subjected to Tensile/Compressive/Shear loads/Bending using UTM <ul style="list-style-type: none"> Writing observations and Tabular column -- 10 Marks Writing Equations required With all notations -- 10 Marks Conduction of Experiment --- 20 Marks Calculation and Result with Graph if any --- 20 Marks 	60
3	01,02	Portfolio evaluation based on the average of all Practice Sessions (1-6 weeks)	10
Total Marks			100

5.(b)For CIE Skill Test -5

Duration :240Min

SL. No.	CO	Particulars/Dimension	Marks
1	02	Calculate and Plot SFD and BMD for the Given Data <ul style="list-style-type: none"> Finding Shear force and Bending Moment – (10+15)=25 Marks Plot SFD and BMD – 15 Marks 	40
2	03,04	Apply finite element formulations to solve the given One dimensional cases and Validate using Ansys <ul style="list-style-type: none"> Solve by FEM Method —25 Marks Validate Using FEM software (Eg: Ansys) ---25 Marks 	50
3	02,03,04	Portfolio evaluation based on the average of all Practice Sessions (7-12 weeks)	10
Total Marks			100

6. Rubrics for Assessment of Activity (Qualitative Assessment)

Sl. No.	Dimension	Beginner	Intermediate	Good	Advanced	Expert	Students Score
		2	4	6	8	10	
1		Descriptor	Descriptor	Descriptor	Descriptor	Descriptor	8
2		Descriptor	Descriptor	Descriptor	Descriptor	Descriptor	6
3		Descriptor	Descriptor	Descriptor	Descriptor	Descriptor	2
4		Descriptor	Descriptor	Descriptor	Descriptor	Descriptor	2
Average Marks= (8+6+2+2)/4=4.5							5

Note: Dimension and Descriptor shall be defined by the respective course coordinator as per the activities

Government of Karnataka
DEPARTMENT OF COLLEGIATE AND TECHNICAL EDUCATION

Programme	Mechanical Engineering	Semester	III
Course Code	20ME32P	Type of Course	Programme Core
Course Name	Machine Tool Technology	Contact Hours	8 hours/week 104 hours/semester
Teaching Scheme	L:T:P :: 3:1:4	Credits	6
CIE Marks	60	SEE Marks	40

1. Rationale: Diploma Engineers are responsible for supervising production processes to achieve production targets and for optimal utilization of resources. For this purpose, knowledge about various machining processes is required to be imparted. The students are to be trained and equipped with adequate theoretical and practical knowledge about Metal Cutting Phenomenon and various processes like turning, drilling, milling, grinding etc. Hence, this course is introduced to provide hands on experience on various machine tools used in the manufacturing stream and to provide foundation for diploma engineers who want to further specialise in the field of precision manufacturing

2. Course Outcomes: At the end of the Course, the student will be able to:

CO-01	List relevant work place Occupational health and safety standards and explain the importance of the need to comply with them.
CO-02	Explain the importance of Cutting tool Geometry, list various Cutting Parameters, the role and use of the right Coolants and Lubricants for the given machining processes.
CO-03	Demonstrate turning operation for a given component drawing and object, prepare a process chart and estimate the cost of its production as per drawing.
CO-04	Demonstrate milling and drilling operation needed as per a given component drawing, list all the machine tools needed for the operation, prepare a process chart and estimate the cost of its production as per the drawing.

3. Course Content

Week	CO	PO*	Lecture (Knowledge)	Tutorial (Activity)	Practice (Skill)
			3 hours/week	1 hour/week	4 hours/week (2 hours/batch twice in a week)
1	01	05	1. Educate about Safety standards Practiced in the machine Shop - Importance of housekeeping and good Shop floor Practices(5S) 2. Understand the Principles of First Aid. Preventive measures to be taken during Fire and Electrical emergency	Refer Table 1	1.Read and interpret the safety signs displayed in the Machine shop Instructor has to show various Safety sign charts and Personnel Protective Equipment (PPE) and ask the trainees to identify and record in the dairy 2.Read and interpret the PPE

			<p>Types of Fire extinguisher (Class A,B,C,D)</p> <p>3. Knowledge about Safety and Environment Regulations</p>		<p>First aid and basic training Identify and Segregate waste material (cotton waste, metal chips, burrs etc.) Arrangement of waste in bins 3. Hazards identification and avoidance Preventive measure for electrical accidents Select the fire extinguisher according to type of fire 4. Operate the Fire extinguisher and extinguish the fire Preventive measure for Oil leakages and related Hazards Practice the safety norms while working on Deferent Machine Tool</p>
2	02	01,04	<p>1 Lubrication- Need of Lubrication- Selection of Lubricant as per ISO standard.</p> <p>2.Theory of metal Removal- Traditional & Non Traditional material removal process- Chip forming & Non chip forming</p> <p>3. Types of cutting tools- Single point tools-Multi point tools – Specification of Single Point Cutting Tool, Parting , Knurling Tool, V- tool</p>	Refer Table 1	<p>1. Instructor has to display all the Lubricants used in the section and brief about its uses 2. Select a Proper lubricant and demonstrate the lubrication of various m Ask the students to record in the Dairy 3. Instructor has to show all the tools, machineries and measuring instruments used in the machine shop and brief about its uses. Ask the students to record in the Dairy. 4. Identify the type of Chips formed and record in the dairy</p>
3	02	01	<p>1. Grinding- Abrasives- Applications of Natural abrasives- stand stone (Quartz), Corundum and Emery Diamond and Garnets- Application of Manufactured Abrasives- Silicon Carbide, Aluminum Oxide Cubic boron Nitride</p> <p>2. Explain – Grit, Grade, Structure, Bond, Type ISO Designation of Grinding Wheels</p> <p>3. Tool Geometry-Tool materials and Designation-Tool life & Wear</p>	Refer Table 1	<p>1. Practice on Grinding machine 2 Grinding Practice of Single point tool as per tool Geometry</p>

			Concept of Cutting speed-Depth of cut-Feed		
4	03	01	<p>1.Introduction to Surface Texture- Indication of Roughness Symbols-Complete surface symbol chart, Grade and Numbers,- Tolerances- Unilateral and Bilateral</p> <p>2.Introduction to Lathe-Types of lathe- Capstone and Turret Lathe, Automatic Lathe and others - Specification of a Center Lathe -. Cutting Fluids- Selection of cutting fluids-</p> <p>3.Explain Work holding Devices- Tool Holding Devices</p>	Refer Table 1	<ol style="list-style-type: none"> 1. Read and interpret the Surface finish and Tolerances in the given Production drawing. 2. Identify the main Parts of Lathe and its functions Identify the movements in Lathe Parts <ul style="list-style-type: none"> • Carriage • Cross Slide • Tail Stock 3. Remove the Chuck from Spindle Nose and again mount on it 4. Demonstration of holding Work piece in 3-Jaw and 4-Jaw chuck 5. Idle operation of Lathe. Rotation of spindle in Clockwise and Counter clockwise direction 6. Identify the Lubrication Parts in Lathe 7. Set the Spindle speed - Feed -Lever Position.
5	03	01,02, 04	<ol style="list-style-type: none"> 1.Explain Plain turning, Step turning, Knurling and Chamfering Operations 2. Prepare the Process plan as per the given drawing for Plain Turning, Step Turning, Knurling and Chamfering 2.Estimate the Production cost per Piece as per the given drawing for Plain Turning, Step Turning, Knurling and Chamfering (Consider all Direct and Indirect costs) 	Refer Table 1	<ol style="list-style-type: none"> 1. Read and Understand the given Drawing 2. Select the suitable Raw material 3. Fix the given material between headstock and Tail Stock after performing Facing and Countersinking. 4. Select the Speed and Feed 5. Select and set the appropriate cutting tools as per the sequence of operations 5 Perform all operations as per the process plan 6. Check the dimensions using measuring instruments 7. Observe and Identify the Chip Formation
6	03	01,02, 04	<ol style="list-style-type: none"> 1.Explain Taper turning operations by different methods- Calculate Taper angles for 	Refer Table 1	<ol style="list-style-type: none"> 1. Read and Understand the given Drawing

			<p>different Taper turning component Drawings</p> <p>2. Prepare the Process plan as per the given drawing for Taper Turning</p> <p>3. Estimate the Production cost per Piece as per the given drawing for Taper Turning(Consider all Direct and Indirect costs)</p>		<p>2. Mark the required dimensions as per the given drawing for Taper turning</p> <p>3. Fix the given material between headstock and Tail Stock</p> <p>4. Select and Set the tools to perform Taper turning</p> <p>5. Select the Speed and Feed</p> <p>6. Perform the Taper Turning operations and record the machining time.</p> <p>7. Measure the Taper angle in the given specimen using Bevel Protractor</p>
7	03	01,04	<p>1.Explain Thread cutting Mechanism</p> <p>a) Half Nut Mechanism</p> <p>b) Tumbler Gear Mechanism</p> <p>2. Prepare the Process plan as per the given drawing for Thread cutting</p> <p>3. Estimate the Production cost per Piece as per the given drawing for Thread cutting (Consider all Direct and Indirect costs)</p>	Refer Table 1	<p>1. Read and Understand the given Drawing</p> <p>2. Fix the given material between headstock and Tail Stock</p> <p>3. Select and Set the tools to perform Thread cutting operations</p> <p>4. Select the Speed, Feed and lubricant</p> <p>5. Perform the thread cutting operations Measure the Pitch of the thread for the given specimen by using Pitch Gauge</p>
8	04	01,04	<p>1. Introduction to Milling – Types of milling machine – Specification of a Milling machine</p> <p>2. Types of Milling cutters and their uses- Milling Cutter Nomenclature- Specification of Milling Cutter</p> <p>3. Methods of Milling- Up Milling and Down Milling- Work holding devices</p>	Refer Table 1	<p>1. Identification of Milling machine Parts and its Usage</p> <p>2. Demonstrate the working Principle of Milling machine and movements of Table and Arbor</p> <p>3. Setting of Vice and Job on the Table of Milling Machine</p> <p>4. Set the Cutter on the Arbor</p> <p>5. Illustrate the safety points to be observed while working on the Milling machine</p> <p>6. Identify and Select the different Milling Cutters</p> <p>7. Demonstrate the Up-milling and Down – Milling Process</p>
9	04	01,02, 04	<p>1.Explain Plain Milling Operation</p> <p>2.. Prepare the Process plan as per the given drawing(Solid Block) for Plain Milling</p> <p>3. Estimate the Production cost per Piece as per the given drawing for Plain Milling</p>	Refer Table 1	<p>1. Perform Plain Milling of Six faces of a Solid Block</p> <p>2. Check the accuracy of the Job with suitable Measuring Instruments</p>

			Operation (Consider all Direct and Indirect costs)		
10	04	01,02,04,07	<ol style="list-style-type: none"> 1.Explain Key way and V- slot Operation 2. Prepare the Process plan as per the given drawing for Key way and V- slot 3. Estimate the Production cost per Piece as per the given drawing for Key way and V- slot 		<ol style="list-style-type: none"> 1. Perform Milling of Keyway and V Slot 2. Check the dimensional accuracy with suitable Measuring Instrument
11	04	01,02,04,07	<ol style="list-style-type: none"> 1. Explain Gear cutting by Indexing Methods 2. Prepare the Process plan as per the given drawing for Gear cutting 3. Estimate the Production cost per Piece as per the given drawing for Gear cutting 	Study the latest technological changes in this course and present the impact of these changes on industry	<ol style="list-style-type: none"> 1. Demonstrate Indexing Head 2. Set and Align Indexing Head with reference to the Job on Milling machine Table 3. Perform Gear Teeth on a Blank by Simple Indexing Method

12	04	01,02, 04,07	<p>1. Introduction to Drilling – Types of Drilling Machines- Specification of Drilling Machines-Specification of Drill Bit, Reamer , Die and Taps</p> <p>2. Nomenclature of Drill Bit, Reamer, Die and Taps- Standard sizes of Drill Bits Explain Operations performed in Drilling Machines- Drilling, Counter sinking, Reaming, Boring, Tapping</p> <p>3. Prepare the Process plan as per the given drawing and Estimate the Production cost per Piece as per the given drawing</p>		<ol style="list-style-type: none"> 1. Identification of Drilling machine Parts 2. Demonstrate the working Principle of Drilling machine 3. Set the Vice and Job on the Table of Drilling machine 4. Illustrate the safety points to be observed while working on the Drilling machine 5. Identify and Select the different Drill Bits 6. Set the Drill bits on the spindle. 7. Drill Equally spaced holes (Circular/Square/Rectangular plate) 8. Finish the pre-drilled hole with a Reamer
13	01, 02, 03, 04		<p>Demonstrate the manufacturing of following components using YouTube Videos</p> <ol style="list-style-type: none"> 1. Fasteners 2. Propeller Shaft 3. Gears 4. Piston manufacturing <p>Discuss and Prepare a Report on the videos Presented for each manufactured component.</p>		<p>Demonstrate the manufacturing of following components using YouTube Videos</p> <ol style="list-style-type: none"> 1. Tube and Piston Rod Manufacturing. 2. Cylinder manufacturing etc., 3. Single point tool 4. Drill bits Etc. <p>Discuss and Prepare a Report on the videos Presented for each manufactured component</p>

- **Course Coordinator must prepare PO – CO mapping with strength (Low/Medium/High) before course planning**

Table 1: Suggestive Activities for Tutorials: (The List is only shared as an Example and not inclusive of all possible activities of the course. Student and Faculty are encouraged to choose activities that are relevant to the topic and on the availability of such resources at their institution)

Sl.No.	Suggestive Activities for Tutorials
01	Present a report on Machine safety Guidelines as per the Applicable standard Guide lines (CSA Standard Z 432-04 (R 2009)) including hazards associated with machines , Power tools, Machine Shop. Also Discuss general controls for reducing machine Hazards. https://ehs.utoronto.ca

02	Discuss Common grinding Problems And their Remedies. Also discuss the need for Balancing the Grinding Wheels. https://www.Euromarconz
03	Whether it's granite for your countertops, backsplash, or floor tiles, making pristine cuts can be achieved with proper precautions, techniques, and specialized granite cutting tools for making tiles and slabs of this hard rock. Discuss and present a report on those tools.
04	Present a Report on Applications of Inversions of Kinematic Mechanisms: With-worth quick return motion mechanism in Shaper Double-slider crank mechanism
05	Present a Case Study on Machine tool chatter arising in an interrupted turning process https://core.ac.uk/download/pdf/33663698.pdf
06	Present a Report on Influence of Cutting Parameters on cutting force and Surface finish in Turning operation https://www.sciencedirect.com
07	Analyse tolerances in a Production Drawing
08	Analyse Surface finish symbols in a Production Drawing
09	Demonstrate the various measuring instruments used in Machine Shop
10	Collect the sample piece of various raw materials used in machine shop and Discuss their mechanical, chemical and Physical properties

Government of Karnataka
DEPARTMENT OF COLLEGIATE AND TECHNICAL EDUCATION

Programme	Mechanical Engineering	Semester	III
Course Code	20ME33P	Type of Course	Programme Core
Course Name	Manufacturing Processes	Contact Hours	8 hours/week 104 hours/semester
Teaching Scheme	L:T:P :: 3:1:4	Credits	6
CIE Marks	60	SEE Marks	40

1. Rationale: Diploma Engineers are responsible for supervising production processes to achieve production targets and for optimal utilization of resources. For this purpose, knowledge about various manufacturing processes is essential. This requires training the students in casting and metal forming domain so as to equip them with adequate theoretical and practical knowledge about the various metal casting and forming processes like rolling, forging, drawing, extrusion, Sheet metal work etc. Hence this course is introduced to provide hands on experience on various manufacturing processes.

2. Course Outcomes: At the end of the Course, the student will be able to

CO-01	Produce patterns, moulds, and casting of a given component drawing and estimate the cost of casting.
CO-02	Demonstrate forging operation for a given component drawing and estimate the cost of forging.
CO-03	Prepare sheet metal drawing, demonstrate sheet metal operation and estimate the costs of Sheet metal operation.
CO-04	Explain rolling and extrusion operation and list applications of metals forming processes.

3. Course Content

Week	CO	PO*	Lecture (Knowledge)	Tutorial (Activity)	Practice (Skill)
			3 hours/week	1 hour/week	4 hours/week (2 hours/batch twice in a week)
1	01	01,04	1. Introduction to foundry – You tube videos on foundries Explain the safety Precautions to be taken in foundries 2. Explain the need of a Pattern- Types of Patterns—Solid or Single Piece pattern, Split Pattern, Loose Piece Pattern, Match Plate Pattern, Gated Pattern, Sweep Pattern, Skeleton-Pattern 3.Allowances- Materials used for Pattern	Refer Table 1	1. Identify the tools and equipment used in foundry with application 2. Prepare a single Piece wooden Pattern considering all allowances
2	01	01,04	1.Molding Sand-Types 2.Ingredients and Properties of Molding Sand	Refer Table 1	1.Prepare a molding sand 2. Preparation of Mold with the help of Pattern

			3. Importance of Core and Core prints-Gates-Runner-Riser		3. Melt the metal (wax) and pouring it into the mold cavity
3	01	01,04	<ol style="list-style-type: none"> 1. Explain Defects in Casting 2. Inspection of Casting 3. Determination of Production Cost of a given material considering Raw material, Process cost, Overheads and other expenses 	Refer Table 1	<ol style="list-style-type: none"> 1. Cutting Runner and riser in the casted component 2. Cleaning of the casted component 3. Inspection of the casted component 4. Record the defects, if any
4	02	01,04	<ol style="list-style-type: none"> 1. Introduction to basic Metal Forming Process and Applications- Show You tube Video's on Metal Forming Process 2. Explain Hot and Cold Working Process with Application Show You tube Videos on Hot and Cold Working Process 3. Introduction to forging operation- Types of forging- Hand forging and Power forging 	Refer Table 1	<ol style="list-style-type: none"> 1. Demonstrate safety precautions to be followed in Forging 2. Identify the tools and equipment's used in forging 3. Forging Practice (Hammering)
5	02	01,04	<ol style="list-style-type: none"> 1. Explain forging Operations - Upsetting, drawing down, Cutting, Bending 2. Explain Punching and Drifting, Setting down and Finishing, Forge Welding 3. Estimation of Length of Raw material required to convert Circular rod to Square and Calculate the Production Cost considering direct and Indirect expenses. 	Refer Table 1	Conversion of Circular rod to Square
6	02	01,04	<ol style="list-style-type: none"> 1. Estimation of Length of Raw material required to convert Circular rod to Hexagon and Calculate the Production Cost considering direct and Indirect expenses. 2. Explain the working principle of Power hammer 3. Show the you tube videos on components produced by Power forging 	Refer Table 1	Conversion of Circular rod to Hexagon
7	02	01,04	<ol style="list-style-type: none"> 1. Estimation of Length of Raw material required to convert Hexagon to " L" shaped Nail and Calculate the Production Cost considering direct and Indirect expenses 2. Explain Forging losses- Forging Defects 	Refer Table 1	Conversion of Hexagon to " L" Nail as per the given drawing

			3. Show the you tube videos on components produced by forging operations		
8	03	01,04	1.Introduction to sheet metal- Show You tube videos on sheet metal operations and Applications 2.Explain sheet metal materials – Standard Gauges of sheet - Specification of Sheet 3.Explain different Sheet metal operations	Refer Table 1	1. Identify and demonstrate the various tools used for sheet metal operations. 2. Measure the gauges of sheet 3. Demonstrate the operations performed on Shearing machine
9	03	01,04	1.Explain the Development of Cone and Cylinder 2. Explain the Development of Prism and Pyramid 3. Explain the Development of Funnel	Refer Table 1	1. Prepare Cone, Cylinder, Prism, Pyramid and Funnel 2. Join end surfaces by means of Seam Joint
10	03	01,04	1.Explain the Development of Tray 2.Explain the Development of Transition pieces 3. Explain the Development of Transition pieces	Refer Table 1	1. Prepare a Tray 2. Prepare any Transition Piece
11	03	01,04 07	1. Find the total Production cost of a sheet metal components like Open container, Cylindrical Drum 2. Introduction to Power Press -Press size- Press tools – Die Accessories 3. Types of Die and its operations		1. Present You tube Videos on Press work operations 2. Record the observations made and prepare a report.
12	04	01,07	1.Introduction to Rolling- Nomenclature of Rolled Products- Dies used in rolling process 2.Types of Rolling mills-2 high mill- 3 High mill – 4 High mill- Cluster mill, Tandem Mill, Planetary mill, Defects in Rolling 3. Introduction to Extrusion and Drawing – Types of Extrusion Process. Wire and Tube Drawing Process, Dies used in Extrusion and Drawing Process	Study the latest technological changes in this course and present the impact of these changes on industry	Video/ Virtual exposure on Rolling and Extrusion
13	04	01,07	Demonstrate the manufacturing of following components using YouTube Videos 1. Crank Shaft 2. Valves 3. Wheel 4. Gear case 5. Hair springs		Demonstrate the manufacturing of following components using YouTube Videos 1. TMT Steels 2. Channel sections 3. Pump Casings 4. Rolling of Sheets

		Discuss and Prepare a Report on the videos Presented for each manufactured component		5. Tooth paste tube 6. Pipes 7. Tubes etc., Discuss and Prepare a Report on the videos Presented for each manufactured component
Total in hours		39	13	52

- *PO= Program Outcome as listed and defined in year 1 curriculum
- Course Coordinator must prepare PO – CO mapping with strength (Low/Medium/High) before course planning

Table 1: Suggestive Activities for Tutorials: (The List is only shared as an Example and not inclusive of all possible activities of the course. Student and Faculty are encouraged to choose activities that are relevant to the topic and on the availability of such resources at their institution)

Sl.No.	Suggestive Activities for Tutorials
01	From heavy casting of 300Kg to small casting of 30 kg, investment casting method is used for as wide for hi-tech industrial applications. Investment casting is largely relied on for complicated designs that cannot be casted using any other method. Discuss. Also, Present the Preparation of Patterns for the Process. Compare the relative surface finish of this process with other Casting Processes.
02	Discuss the forging defects commonly occurring in forgings, their causes and Remedies. Present the methodology for measuring Forging defects. https:// studentlesson.com
03	A Gas cylinder is produced by Sheet metal operations. Prepare the development and Present the procedure involved in making the given component.
04	Identify the forming process adopted in making Tooth Paste Tubes. Present the process. List the limitations involved and solutions to overcome these limitations.
05	Estimation of Length of Raw material required for a forged bolt and Calculate the Production Cost considering direct and Indirect expenses.

4. CIE and SEE Assessment Methodologies

Programme	Mechanical Engineering	Semester	III
Course Code	20ME34P	Type of Course	Programme Core
Course Name	Fluid Power Engineering	Contact Hours	8 hours/week 104 hours/semester
Teaching Scheme	L:T:P :: 3:1:4	Credits	6
CIE Marks	60	SEE Marks	40

DEPARTMENT OF COLLEGIATE AND TECHNICAL EDUCATION

1. Rationale: Fluid power is one of the basic building blocks of modern automation and is most widely used system to convert fluid energy into useful work through the use of pump, compressor, control valves, actuators and other controlling elements. This technology is used to power a range of items such as tools, construction equipment and machineries, automotive and machineries in manufacturing sectors. Fluid power engineering involves study of properties of fluids, laws governing flow of fluids, working principles of fluid machineries and knowledge of control of machine movements. This course allows the students to develop the knowledge and understanding of the operational requirements of fluid power system and be able to recognise circuit components and build the circuits for applications needed in daily life

2. Course Outcomes: At the end of this course, student will be able to

CO-01	Measure fluid discharge through Channels and Pipes using instruments and estimate the size of the pipe needed for a given population size.
CO-02	Select the right hydraulic machinery to be used in a specific application for a given head and discharge.
CO-03	List the various components and its use in a given fluid power system.
CO-04	Build a simple fluid power system for a given application

3. Course Content

Week	CO	PO*	Lecture (Knowledge)	Tutorial (Activity)	Practice (Skill)
			3 hours/week	1 hour/week	4 hours/week (2 hours/batch twice in a week)
1	01	01,04	1. Explain classification and Properties of fluids- Units- Conversion of Cubic meters- Liters – Gallons -TMC 2. Explain Pascal Law, Equation of continuity, Concept of Total Energy 3. Explain Bernoulli's equation and its Applications- Venturi meter, Pitot tube, Orifice meter	Ref Table 1	1.Find Discharge of a fluid through Venturimeter
2	01	01,04	1. Explain Discharge through Rectangular Notch -Numerical Problems 2.Explain Discharge through V- notch - Numerical Problem 3. Explain Flow through Pipes- Major and Minor Losses	Ref Table 1	1. Finding Discharge through Rectangular Notch 2. Finding Discharge through V- Notch

3	01	01,04	<ol style="list-style-type: none"> 1. Determine co-efficient of friction by using Chezy's and Darcy's formulae 2. Design a Pipe for a given number of Inhabitants 3. Design a Pipe for a given discharge 	Ref Table 1	<ol style="list-style-type: none"> 1. Finding Co-efficient of Friction in Pipes 2. You tube presentation on fluid flow through pipes and notches
4	02	01,02,04	<ol style="list-style-type: none"> 1. Classification of Pumps 2. Explain the Working Principle of Centrifugal Pump and its Application 3. Explain the Working Principle of Monoblock and its Application 	Ref Table 1	<ol style="list-style-type: none"> 1. Find the discharge through Centrifugal Pump 2. Servicing and Repair of Centrifugal Pumps
5	03	01,02,04	<ol style="list-style-type: none"> 1. Explain the Working Principle of Submersible pump and its application 2. Explain the Working Principle of Reciprocating pump and its application 3. Select a suitable Pump for a given Application 	Ref Table 1	Servicing and Repair of Submersible pumps
6	02	01,04	<ol style="list-style-type: none"> 1. Classification of Hydraulic Turbines 2. Select a suitable Turbine for a given Head 3. Explain the Working Principle of Impulse Turbine and its Application 	Ref Table 1	Determine Performance of Pelton wheel
7	02	01	<ol style="list-style-type: none"> 1. Explain the Working Principle of Reaction Turbine and its Application 2. Explain the Importance of Draft tube, Penstock and Surge Tank 3. Video on Hydraulic Power Plant 	Ref Table 1	Video on fluid flow from source to End application Eg: Oil Refineries, Hydraulic Power plant, Water distribution through pipe lines
8	03	01	<p>Identify the basic components of Fluid power Systems with Symbols and Application</p> <ul style="list-style-type: none"> • Air compressor • Air Drier • FRL Unit • Gear Pump • Pressure control Valve- Pressure Reducing Valve, Pressure Intensifier • Direction control Valves - 3/2 , 5/2, 4/2 • Flow control Valve • Needle Valve • Check Valve • Shuttle Valve • Quick Exhaust Valve • Time Delay Valve 	Ref Table 1	Video on Working principles of components used in Fluid Power Systems
9	03	01	<ul style="list-style-type: none"> • Explain Valve Actuating mechanisms - Spring, Lever, Push button, Solenoid • Explain the role of Accumulators in fluid power systems. • Explain working principle of Actuators- Single Acting, Double acting Air Cylinders, Air Motors 	Ref Table 1	Video on Working principles of components used in Fluid Power Systems

			<ul style="list-style-type: none"> • Explain the importance of Seals and Packages 		
10	04	01,04	<ul style="list-style-type: none"> • Build a Fluid Power circuit to Control Speed of a Single Acting cylinder • Build a Fluid Power circuit to Control Speed of a Double Acting cylinder • Build a Fluid Power circuit for Pilot control Double Acting Cylinder 	Ref Table 1	Execute the circuit Practiced in the Class using Trainer Kit or Simulation Software
11	04	01,04,07	<ul style="list-style-type: none"> • Build a Fluid Power circuit for double Acting Cylinder being controlled by 4/2 DC Solenoid Operated Valve • Build a Circuit for Stamping operation by using 3/2 DC Valve with Single Acting Cylinder • Build a Circuit for Automatic Opening and Closing of Door by /using double Acting Cylinder being controlled by 4/2 DC Valve 		Execute minimum 2 Circuits Practiced in the Class using Trainer Kit or Simulation Software
12	04	01,03,07	<ul style="list-style-type: none"> • Build a Fluid Power circuit for Automatic reciprocating motion of a double acting Cylinder • Build a circuit for feeding a strip with following sequences: Holding the strip, moving the strip forward on to the tool, maintaining the strip in that position and returning the strip to its original position after work is over. • Design a Circuit to press fit a pin to a hole with a precondition that while actuating of the cylinder, both the hands of the operator should be engaged 	Study the latest technological changes in this course and present the impact of these changes on industry	Execute minimum 2 Circuits Practiced in the Class using Trainer Kit or Simulation Software
13	04	01,07	<ul style="list-style-type: none"> • Build Circuit for a machine device driven by a single acting cylinder with actuation at least two mutually operated DC valves (Safety circuit with OR and AND Gates) • Build Circuit for the Clamping Device of a Drilling Machine of a Drilling machine such that the clamps are activated before the drill is fed to the Work • Build a Circuit for your Own Application 		Execute minimum 2 Circuits Practiced in the Class using Trainer Kit or Simulation Software, including developing your Own Pneumatic Circuit to perform certain function
Total in hours			39	13	52

- Course Co-Ordinator must prepare PO – CO mapping with strength (Low/Medium/High) before course planning

Table 1: Suggestive Activities for Tutorials: (The List is only shared as an Example and not inclusive of all possible activities of the course. Student and Faculty are encouraged to choose activities that are relevant to the topic and on the availability of such resources at their institution)

Sl.No.	Suggestive Activities for Tutorials
01	Document and present the application of Pascal's Principle in Real Life by selecting Hydraulic Jack/Hydraulic Brakes/ Hydraulic Lift https://www.studiousguy.com
02	Present a report on possible failures in Submersible Pumps and trouble shoot the same.
03	Discuss and present the application of Pneumatics in farming using case study: Farming in California- The issues and Positivity's
04	Build and Present an Electro-Pneumatic Brake system used in Trains. Also, document Brake Cylinder Pressure effect.
05	Prepare a line Diagram of the pipe line of your Residence or College
06	Prepare a water distribution line diagram from Water reservoir to college
07	Prepare a line diagram for rain water harvesting of your Residence or College
08	Study and prepare a report on water distribution in Dip Irrigation System.

4. CIE and SEE Assessment Methodologies

Sl. No	Assessment	Test Week	Duration In minutes	Max marks	Conversion
1.	CIE-1 Written Test	5	80	30	Average of three tests 30

4TH SEMESTER

Government of Karnataka
DEPARTMENT OF COLLEGIATE AND TECHNICAL EDUCATION

Programme	Mechanical Engineering	Semester	IV
Course Code	20ME41P	Type of Course	Programme Core
Course Name	Operations Management	Contact Hours	8 hours/week 104 hours/semester
Teaching Scheme	L:T:P :: 3:1:4	Credits	6
CIE Marks	60	SEE Marks	40

1. Rationale: The success of any organisation not only depends on quality of its products and services but also depends on the people within it. Thus, an operational manager has to play a prominent role in an organisation with human capital and machines. Therefore, managerial skills are essential for enhancing their employability and carrier growth. This course is therefore designed to provide basic concepts in operations management, forecasting techniques, capacity planning, aggregate planning, master production schedule, quality, and inventory and supply chain management for effective utilisation of resources and competitive advantage through operational excellence

2. Course Outcomes: On Completion of course, the student will be able to:

CO-01	Prepare a production capacity utilization plan based on demand forecast and available production capacity for a given product.
CO-02	Prepare a master production plan based on a production capacity utilization plan and a material management plan for a given product.
CO-03	Prepare a process plan using time study, motion study and other appropriate methods to ensure process efficiency.
CO-04	Prepare a quality assurance plan based on a given quality model which is suitable for either a product or a service organisation.

3. Course Content

Week	CO	PO*	Lecture (Knowledge)	Tutorial (Activity)	Practice (Skill)
			3 hours/week	1 hour/week	4 hours/week (2 hours/batch twice in a week)
1	01	01	Introduction to Operation Management 1. Introduction to Operation Management - Operation Functions	Ref Table 1	<ul style="list-style-type: none"> •Virtual Tour Organization (You tube) •Problems on Productivity
			2. Evolutions and Historical Events in Operational Management		
			3. Productivity and Competitiveness, Strategy and operation		
2	01	01	DEMAND FORECASTING 1.Demand Forecasting- Demand Behavior-Trend Cycle - Seasonal Background - Steps in Forecasting Process	Ref Table 1	Problems on <ul style="list-style-type: none"> •Qualitative Forecast - Delphi method, Market Research method •Quantitative Forecast - Time series Method <ul style="list-style-type: none"> a) Moving average (Naive forecast , Simple moving
			2. Short range and Long Range Forecast		
			3. Qualitative Forecast methods		

					Average, Weighted moving Average)
3	01	01	1. Quantitative Forecast methods	Ref Table 1	Problems on b) Exponential smoothing
			2. Seasonal Adjustments		
			3. Forecast Accuracy		
4	01	01	CAPACITY AND AGGREGATE PLANNING 1. Need for Capacity Planning – Capacity expansion Strategies – Capacity planning Models.	Ref Table 1	Problems on •Capacity Planning, •Aggregate planning •Master production Schedule
			2. Aggregate planning- Methods		
			3. Master production Schedule		
5	01	01	PROCESS PLANNING 1. Make or Buy Decision Outsourcing- Factors for Outsourcing decision- Process Selection – Batch , Mass ,Continuous	Ref Table 1	•Virtual Tour on Batch, Mass and continuous Process •Develop an Operation Sheet indicating Process Plan and Process flow chart for a given component.
			Components of e-manufacturing		
6	03	01	1.Motion Study	Ref Table 1	•Develop Job Process chart with Process Symbols for a given Process. •Develop Man- Machine chart for a given Process. •Case study on Time Study Principles for a given process.
			2. Man- Machine chart		
			3. Concepts on Time Study		
7	02	01	INVENTORY MANAGEMENT 1. Elements of Inventory Management- Inventory Costs- Carrying, Ordering and Shortage Costs	Ref Table 1	Problems on •ABC Classification System •Economic Order Quantity Models •The Production Quantity Model
			2.Inventory Control Systems- Continuous Inventory System (Fixed-Order-Quantity System) Periodic Inventory System (Fixed-Time-Period System)		
			3. Concept on ABC Classification, Economic Order Quantity Models, Production Quantity Model		
8	02	01,02	1. Order Quantity for A Periodic Inventory System Order Quantity with Variable Demand	Ref Table 1	Case study on JIT (Eg:Toyoto Production System)
			2. JIT -Pull System		
			3 Kanban's System		
9	02	01	Supply Chain Management 1.Supply Chains Supply Chains for Service Providers	Ref Table 1	Study on •The Bullwhip Effect •Risk Pooling •Green Supply Chains
			2.Value Chains The Management of Supply Chains		
			3.Vendor Selection- Vendor		

			evaluation and Vendor Development, Negotiations		
10	02	01	1. Supply Chain Uncertainty and Inventory	Ref Table 1	Study on • Information Technology: Supply Chain Enabler • Bar Codes • Radio Frequency Identification • Build-To-Order (BTO)
			2. E-Business, Electronic Data Interchange		
			3. Supply Chain Integration- Collaborative Planning, Forecasting, And Replenishment		
11	02	01,07	1. Material Requirements Planning (MRP) Enterprise Resource Planning (ERP),		Case study on Procurement- Outsourcing. • E-Procurement • E-Market places • ERP MODULES
			2. Warehouse Management Systems Collaborative Logistics, Distribution Outsourcing		
			3. Finance/Accounting- Sales/Marketing- Production/Materials Management- Human Resources		
12	04	01,04,07	QUALITY MANAGEMENT 1. Quality from The Customer's Perspective Dimensions of Quality for Manufactured Products Dimensions of Quality for Services	Study the latest technological changes in this course and present the impact of these changes on industry	Practice on Quality Tools • Process Flowcharts • 5 Whys, Cause-And-Effect Diagrams • Check sheets And Histograms • Pareto Analysis • Scatter Diagrams
			2. Quality from The Producer's Perspective A Final Perspective On Quality The Cost of Quality The Cost of Achieving Good Quality		
			3. The Cost of Poor Quality The Quality-Productivity Ratio Quality Management System		
13	04	04,05,07	1. TQM and QMS The Focus of Quality Management— Customers		Practice on The Deming Wheel (PDCA Cycle) • Process Control Charts • Statistical Quality Control • ISO 9000 • ISO14000
			2. Quality Management in The Supply Chain The Role of Employees in Quality Improvement Kaizen and Continuous Improvement Quality Circles		
			3. Process Improvement Teams Six Sigma The Breakthrough Strategy: DMAIC		
Total in hours			39	13	52

SALES	50	200	80	40	360														
02	<p>Delph Manufacturing Company is going to purchase an auto parts component from one of two competing suppliers. Delph is going to base its decision, in part, on the supply chain performance of the two suppliers. The company has obtained the following data for average raw materials, work-in-process, and finished goods inventory value, as well as cost of goods sold for the suppliers</p> <table border="1"> <thead> <tr> <th>Items</th> <th>Supplier 1</th> <th>Supplier 2</th> </tr> </thead> <tbody> <tr> <td>Cost of goods sold</td> <td>Rs 8,360,000</td> <td>14,800,000</td> </tr> <tr> <td>Raw materials</td> <td>270,000</td> <td>870,000</td> </tr> <tr> <td>Work-In-Progress</td> <td>62,000</td> <td>550,000</td> </tr> <tr> <td>Finished goods</td> <td>33,000</td> <td>150,000</td> </tr> </tbody> </table> <p>Each company operates 52 weeks per year. Determine which supplier has the best supply chain performance according to inventory turns and weeks of supply. What other factors would the company likely take into account in selecting a supplier?</p>	Items	Supplier 1	Supplier 2	Cost of goods sold	Rs 8,360,000	14,800,000	Raw materials	270,000	870,000	Work-In-Progress	62,000	550,000	Finished goods	33,000	150,000			
Items	Supplier 1	Supplier 2																	
Cost of goods sold	Rs 8,360,000	14,800,000																	
Raw materials	270,000	870,000																	
Work-In-Progress	62,000	550,000																	
Finished goods	33,000	150,000																	
03	<p>The maintenance department for a small manufacturing firm has responsibility for maintaining an inventory of spare parts for the machinery it services. The parts inventory, unit cost, and annual usage are as follows</p> <table border="1"> <thead> <tr> <th>Part</th> <th>Unit Cost(Rs)</th> <th>Annual Usage</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>100</td> <td>90</td> </tr> <tr> <td>2</td> <td>350</td> <td>40</td> </tr> <tr> <td>3</td> <td>30</td> <td>130</td> </tr> <tr> <td>4</td> <td>20</td> <td>180</td> </tr> <tr> <td>5</td> <td>320</td> <td>50</td> </tr> </tbody> </table> <p>The department manager wants to classify the inventory parts according to the ABC system to determine which stocks of parts should most closely be monitored</p>	Part	Unit Cost(Rs)	Annual Usage	1	100	90	2	350	40	3	30	130	4	20	180	5	320	50
Part	Unit Cost(Rs)	Annual Usage																	
1	100	90																	
2	350	40																	
3	30	130																	
4	20	180																	
5	320	50																	
04	<p>The design capacity for engine repair in our company is 80 trucks/day. The effective capacity is 40 engines/day and the actual output is 36 engines/day. Calculate the utilization and efficiency of the operation. If the efficiency for next month is expected to be 82%, what is the expected output?</p>																		
05	<p>County school buses are inspected every month for “defects.” In a recent monthly inspection, 27 worn or torn seats were found, 22 buses had dirty floors, there were 14 cases of exterior scratches and chipped paint, there were 8 cracked or broken windows, the engines on 4 buses had trouble starting or were not running smoothly, and 2 buses had faulty brakes. Develop a Pareto chart for the bus inspections and indicate the most significant quality-problem categories. What does this tell you about the limitations of applying Pareto chart analysis? How might these limitations be overcome in Pareto chart analysis</p>																		
06	Study and prepare a report on Inventory management in A Super Bazaar																		
07	Case study on Supply chain Management in Amazon, Flikart etc																		
08	Case study on use of ERP in An Education Institution (From Admission to Award of Degree)																		
09	Case study on logistics management in Swiggy, Zomoto, Dunzo etc

Government of Karnataka
DEPARTMENT OF COLLEGIATE AND TECHNICAL EDUCATION

Programme	Mechanical Engineering	Semester	IV
Course Code	20ME42P	Type of Course	Programme Core
Course Name	CNC Programming and Machining	Contact Hours	8 hours/week 104 hours/semester
Teaching Scheme	L:T:P :: 3:1:4	Credits	6
CIE Marks	60	SEE Marks	40

1. Rationale: In recent years the manufacturing environment has undergone dramatic change. For achieving market goals, it is essential to produce quality parts in less time. Evolution of information technology, variety manufacturing concepts with zero lead time demand and quality consciousness have supported fast adaption of computerized numerical control (CNC) machines. As in human beings' mental ability is becoming more important than physical ability to do the manual work, similarly CNC programming in the same way has more importance along with selection and use of CNC tooling. In this course therefore an attempt has been made to develop skills required for programming, tooling etc for CNC machine. CNC machines normally are not limited to machine tools only but realm of CNC has widened in almost all areas of manufacturing, processes and support activities. It is therefore very important for Diploma mechanical engineers to master CNC technology.

2. Course Outcomes/Skill Sets: At the end of this course, student will be able to:

CO-01	Identify various components of a CNC machine and list the use of those components for any given CNC operation.
CO-02	Study a given production drawing and list the right tools needed to produce a product as per the drawing.
CO-03	Write a CNC turning and milling program for a given production drawing, simulate the program and execute the program in production mode.
CO-04	Develop and/or import a 3-D model of a given component drawing, generate the CNC programming codes using CAM software and execute the program in production mode.

3. Course Content

Week	CO	PO*	Lecture (Knowledge)	Tutorial (Activity)	Practice (Skill)
			3 hours/week	1 hour/week	4 hours/week (2 hours/batch twice in a week)
1	01	01	1.Introduction to CNC Machines- Advantages of CNC machines over Conventional machines 2.Explain the Construction features of CNC machine- Machine Structure, bed, spindle motor and drive, axes motor and ball screws using Multimedia 3. Explain Guide ways, LM guides, console, control switches, coolant system, hydraulic system using Multimedia	Ref Table 1	1. Demonstrate Personal, Conduct, Shop etiquettes and general safety practices in CNC machine Comply safe handling of CNC machines, tools and Equipment. 2.Demonstration of CNC machine and its parts - bed, spindle motor and drive, axes motor and ball screws, guide ways, LM

					guides, console, control switches, coolant system, hydraulic system, 3. Identification of safety switches, machine over travel limits and emergency stop. Machine starting & operating in Reference Point, JOG and Incremental Modes
2	01,02	01	1.Explain Axis convention of CNC machine 2. Explain Cutting tool materials, cutting tool geometry – insert types, holder types, insert cutting edge geometry. 3. ISO nomenclature for turning tool holders, boring tool holders, indexable inserts. - Tool holders and inserts for radial grooving, face grooving, threading, drilling	Ref Table 1	1.Conduct a preliminary check of the readiness of the CNC machine viz., cleanliness of machine, referencing – zero return, 2.Functioning of lubrication, coolant level, correct working of sub-system
3	01,02	01,04	1.Explain Automatic tool exchanger using Multimedia 2. Explain the importance of Tool length compensation, Tool nose Radius compensation and Tool Wear compensation. 3. Explain Machine Zero and Work Zero	Ref Table 1	1.Perform Work and tool setting: - Job zero/work coordinate system and tool setup and live tool setup 2. CNC machining centre operation in various modes: JOG, EDIT, MDI, SINGLE BLOCK, AUTO 3. Setting the tool offsets, entry of tool nose radius and orientation in CNC console
4	03	01,04	1.Explain Programming sequence and format - Absolute and Incremental System 2.Explain G codes and M codes 3. Explain Linear interpolation and Circular Interpolation	Ref Table 1	1. Geometry Wear Correction. Geometry and wear offset correction in CNC Console 2. Program checking in dry run, single block modes
5.	03	01	1.Explain cutting Parameters – Feed, Speed and depth of cut w.r.t CNC machine as per Catalogue 2. Explain Canned Cycle, Mirroring and Subroutines	Ref Table 1	1.Learn various numerical keys, Address Keys, functional Keys of operational console
6.	03	01,04	Write the Part Program for Facing, Turning, Step turning and Taper turning (Write Program for 3 models and execute any one on the machine)	Ref Table 1	1.Input the Program into the Simulator and operate the Simulator 2.Transfer the simulated Program to machine

					<p>3.Set the machine with necessary tools and Job</p> <p>4. Execute the Program in Auto mode to produce the Job.</p>
7.	03	01,04	Write the Part Program for Turning, Profile turning and Thread cutting (Write Program for 3 models and execute any one on the machine)	Ref Table 1	<p>1.Input the Program into the Simulator and operate the Simulator</p> <p>2.Transfer the simulated Program to machine</p> <p>3.Set the machine with necessary tools and Job</p> <p>4.Execute the Program in Auto mode to produce the Job</p>
8.	03	01,04	Write a CNC milling program for Pocket machining (Write Program for 3 models and execute any one on the machine)	Ref Table 1	<p>1.Input the Program into the Simulator and operate the Simulator</p> <p>2.Transfer the simulated Program to machine</p> <p>3.Set the machine with necessary tools and Job</p> <p>4.Execute the Program in Auto mode to produce the Job</p>
9	03	01,04	Write a part program for drilling 4 holes in a plate Six holes along PCD on a circular plate	Ref Table 1	<p>1.Input the Program into the Simulator and operate the Simulator</p> <p>2.Transfer the simulated Program to machine</p> <p>3.Set the machine with necessary tools and Job</p> <p>4.Execute the Program in Auto mode to produce the Job</p>
10.	03	01,04,07	Write a Program using Mirroring Write a Program using Subroutines	Ref Table 1	<p>1.Input the Program into the Simulator and operate the Simulator</p> <p>2.Transfer the simulated Program to machine</p> <p>3.Set the machine with necessary tools and Job</p> <p>4.Execute the Program in Auto mode to produce the Job</p>

11	04	01,04,07	Generate the Part Program for Component requiring Turning, Step turning Profile turning and Thread cutting by using CAM software (Program for 3 models and execute any one on the machine)		1. Transfer the simulated Program to machine 2. Set the machine with necessary tools and Job 3. Execute the Program in Auto mode to produce the Job
12	04	01,04,07	Generate a CNC program for component having Pocket machining using CAM software (Program for 3 models and execute any one on the machine)	Study the latest technological changes in this course and present the impact of these changes on industry	1. Transfer the simulated Program to machine 2. Set the machine with necessary tools and Job 3. Execute the Program in Auto mode to produce the Job
13		Demonstrate the manufacturing of following components on CNC machines using YouTube Videos 1. CNC Turning 2. Rollers 3. Spacers 4. Brackets Discuss and Prepare a Report on the videos Presented for each manufactured component	Demonstrate the manufacturing of following components on CNC machines using YouTube Videos 1. Spindles 2. Frames 3. Engine Block 4. Ball Bearings Discuss and Prepare a Report on the videos Presented for each manufactured component		
Total in hours			39		13

- *PO= Program Outcome as listed and defined in year 1 curriculum
- Course Co-Ordinator must prepare PO - CO mapping with strength (Low/Medium/High) before course planning

Table 1: Suggestive Activities for Tutorials: (The List is only shared as an Example and not inclusive of all possible activities of the course. Student and Faculty are encouraged to choose activities that are relevant to the topic and on the availability of such resources at their institution)

Sl.No.	Suggestive Activities for Tutorials
01	Discuss the steps for choosing the Right CNC machine tool using various parameters like operator experience, Material to be cut, Part difficulty and complexity, LM guides, Control systems, Cost per part, Availability of space. www.hwaeonasia.com
02	Presentation on Macros and Parametric Programming in CNC by discussing basic macro skill- Macro capability, common features and applications- Macro structure www.thomasnet.com
03	Discuss and present a report on influence of coolant in CNC by explaining Purpose- delivery methods of coolants- Types of coolants- Health and safety issues- Properties- Recycling and disposal of cutting lubricants www.Industr.com
04	Each student has to Present minimum 5 CNC Programming on Machining involving Turning, Milling and Drilling. (Course coordinator has to ensure no repetition of the Programs)

4. CIE and SEE Assessment Methodologies

Sl. No	Assessment	Test Week	Duration In minutes	Max marks	Conversion

Government of Karnataka
DEPARTMENT OF COLLEGIATE AND TECHNICAL EDUCATION

Programme	Mechanical Engineering Diploma	Semester	IV
Course Code	20ME43P	Type of Course	Programme Core
Course Name	Product Design and Development	Contact Hours	8 hours/week 104 hours/semester
Teaching Scheme	L:T:P :: 3:1:4	Credits	6
CIE Marks	60	SEE Marks	40

1. Rationale: Design department of industry is one of the major job areas for Diploma engineers. The fundamental knowledge of Strength of Materials, Engineering Materials, and Computer Aided Design and Drafting is essential to meet job requirement in this sector. To enable a student to work here, they should know how to design a simple machine element, usual procedures in development of product, fundamental knowledge in design of simple machine elements such as shafts, springs, couplings etc, codes, norms, standards and guidelines for selection of appropriate material. In addition to this, Diploma engineers are required to read and interpret the drawings. Therefore, it is essential that they have competency in preparing drawings of machine parts. This course aims at developing analytical abilities in the student to give solutions to simple engineering design problems using standard procedures. Hence this course has been introduced with the expectations that efforts will be made to provide appropriate learning experiences in the use of basic principles to the design solution for applied problems to develop the required skill and competencies.

2. Course Outcomes/Skill Sets: At the end of the Course, the student will be able to:

CO-01	Explain the key principles of product design considering Strength, Aesthetic and Ergonomic
CO-02	Design simple machine elements like shafts, springs, couplings and knuckle joints using standard data.
CO-03	Prepare CAD Part and Assembly drawings for couplings and knuckle joints based on designed parameter.
CO-04	Produce Component based on designed Parameters using 3- D Printing Techniques

3. Course Content

Week	CO	PO*	Lecture (Knowledge)	Tutorial (Activity)	Practice (Skill)
			3 hours/week	1 hour/week	4 hours/week (2hours/batch twice in a week)
1	01	01	Product Development and Design: 1.Explain Product Development- Stages of Product Development- Need and Feasibility study 2.Explain Development of design- Selection of Materials and Process 3.Explain Prototype –launching of product –Product life cycle	Ref Table 1	Discuss case studies of Product development by using Video
2	01	01	General consideration in design: Based on <ul style="list-style-type: none"> • Functional requirement • Effect on environment • Life, Reliability, Safety 	Ref Table 1	Case study

			<ul style="list-style-type: none"> • Principles of Standardization • Assembly Feasibility • Maintenance-Cost-Quantity • Legal issues and Patents • Aesthetic and Ergonomic factors • Choice of Materials • Feasibility of Manufacturing Processes 		
3	01	01	<p>Aesthetic and Ergonomic consideration in Design:</p> <ul style="list-style-type: none"> • Explain Aesthetic considerations- Basic types of product forms, Designing for appearance, shape, Design features, Materials, Finishes, proportions, Symmetry Contrast etc. • Morgan's color code. • Ergonomic considerations- Relation between man, machine and environmental factors. Design of displays and controls. 	Ref Table 1	Case Study on Ergonomics and Aesthetic design principles.
4	02	03,04	<p>Torsion of Shaft:</p> <ol style="list-style-type: none"> 1.Assumptions in Shear stress in a shaft subjected to torsion – Strength and Rigidity (Solid and Hollow shaft) 2.Power Transmitted by Solid and Hollow shaft - ASME and BIS Code for power Transmission 3.Problems on Shafts subjected to only Shear based on Rigidity and Strength 	Ref Table 1	1. Validate the Problems on Shafts for Strength and Rigidity using Ansys (One each on Strength and Rigidity)
5	02	03,04	<ol style="list-style-type: none"> 1.Problems on Shafts subjected to only Shear based on Rigidity and Strength 2.Problems on Shaft subjected to only Bending 3. Problems on Shaft subjected to only Bending 	Ref Table 1	1. Recap of CAD commands 2.Practice on Section of Solids- a)Prisms b) Pyramid

Government of Karnataka
DEPARTMENT OF COLLEGIATE AND TECHNICAL EDUCATION

Programme	Mechanical Engineering	Semester	IV
Course Code	20ME44P	Type of Course	Programme Core
Course Name	Elements of Industrial Automation	Contact Hours	8 hours/week 104 hours/semester
Teaching Scheme	L:T:P :: 3:1:4	Credits	6
CIE Marks	60	SEE Marks	40

1. Rationale: In present scenario, Manufacturing industries are moving towards complete automation. Small and medium industries are in a phase of switching to PLC and SCADA technology for data acquisition and control. Industrial automation systems are used to control and monitor a process, machine or device in a computerized manner that usually fulfils repetitive functions or tasks. They are intended to operate automatically in order to reduce and improve human work in the industry. Advantages of this technology is commonly attributed to higher production rates and increased productivity, more efficient use of materials, better product quality, improved safety, shorter workweeks for labour, and reduced factory lead times. The Automation Engineer will design, program, simulate and commission automated machines and plant-wide processes to perform many job functions. Depending on the size of the organization, the engineer will perform some or all of these responsibilities. Therefore, it is necessary for diploma engineers to have knowledge of both PLC and SCADA technology. This course attempts to provide basic theoretical and practical aspects of automation technologies to develop operational competency. Hence this course is the foundation for diploma engineers who want to further specialise in the field of industrial automation

2. Course Outcomes: At the end of this course, student will be able to

CO-01	Select the right sensor and/or actuator for automating a given application and demonstrate process variables using sensors and/or transducers.
CO-02	Perform specified control functions using a Programmable Logic Controller (PLC) and list various applications of embedded systems.
CO-03	Design and test an automation system for a required operational specification and troubleshoot to resolve any given issue(s).
CO-04	Explain the concepts of SCADA, HMI and DCS and list their various applications

3. Course Content

Week	CO	PO*	Lecture (Knowledge)	Tutorial (Activity)	Practice (Skill)
			3 hours/week	1 hour/week	4 hours/week (2 hours/batch twice in a week)
1	01	01	Introduction:	Ref Table 1	Study the following appliances/ automation

			<p>1. Need and benefits of Industrial Automation, Automation Hierarchy, Basic components of automation system, description of each component</p> <p>2. Automation technology as a part of engineering sciences, Key development milestones in the history of automation technology, Effects of automation on people.</p> <p>3. Types of automation system:- Relay logic and PLC</p>		<p>systems and identify various elements used and their function</p> <p>1. Air conditioning System 2. Automatic water level control 3. Elevator(for Three Floor) 4. Washing Machine</p> <p>Write the Block Diagram For each and explain with a Multimedia Presentation</p>
2	01	01	<p>Programmable logic controller:</p> <p>1. Introduction, Compare Relay Logic Control and PLC Logic Control, Internal Architecture of PLC</p> <p>2. I/O Modules (Interfaces), Memory organization.</p> <p>Input devices:</p> <ul style="list-style-type: none"> • Mechanical Switches • Proximity Switches <p>3. Input devices:</p> <ul style="list-style-type: none"> • Photo electric Sensors and Switches • Encoders • Temperature Sensors • Position/Displacement Sensors 	Ref Table 1	<p>Demonstrate the working of below shown Switches/Sensor.</p> <p>a. Various industrial Switches (Push Button, ON/OFF, Toggle, Emergency, Rotary Switches etc.) b. Proximity- Inductive, Capacitive and Optical Sensor c. Temperature Sensor d. Float Sensors</p> <p>Note: Connect each sensor directly to the LED/Lamp with appropriate power supply</p>
3	01	01	<p>1. Input devices:</p> <ul style="list-style-type: none"> • Strain Gauges • Pressure Sensors • Liquid level detectors <p>2. Input devices:</p> <ul style="list-style-type: none"> • Fluid flow measurement • Smart Sensors <p>3. Output Devices:</p> <ul style="list-style-type: none"> • Relay • Directional control Valve 	Ref Table 1	<p>You tube presentation on Input and Output devices</p>

4	01	01	<p>1. ADC and DAC</p> <p>2. Motors- DC motor, Synchronous motor, Servo motor,</p> <p>3. Induction motor, Stepper motor</p>	Ref Table1	<p>Demonstrate the Forward and Reversal of Stepper, Servo and DC Motors with the help of Drivers.</p> <p>Note: Demonstrate the above without using any controllers</p>
5	02	02	<p>PLC Programming:</p> <p>1. Programming standards, List Different PLC Programming, Ladder diagram,</p> <p>2. Standard IEC 1131-3 Symbols used for I/O Devices</p> <p>3. Ladder diagram for logic gates. AND,OR,NOT,NAND,NOR,XOR, XNOR</p>	Ref Table1	<ul style="list-style-type: none"> • Execute energized motor or bulb using Switches in series or Parallel • Write ladder diagram to test digital logic gates and Execute/Simulate the same.
6	02	01	<p>1. Writing Equivalent ladder diagram for Electric Switch, Belt drive , motor circuit</p> <p>Latching, Sequential O/P</p> <p>2. Introduction to Timer functions. Applications of timing functions in process control -- On Delay Timer Function, Off-delay Timer Function</p>	Ref Table 1	<ul style="list-style-type: none"> • There are 3 mixing devices on a processing line A,B ,C. After the process begin mixer-A is to start after 7 seconds elapse, next mixer-B is to start 3.6 second after A. Mixer-C is to start 5 seconds after B. All of them remain ON until a master enable switch is turned off. Develop PLC ladder diagram, timing diagram and simulate the same • Write a Ladder Program to count the number of Items moving

			3. PLC counter functions, Applications of PLC counter function in process control		on a conveyor Belt and Execute/Simulate the same
7	03	02	<p>1) Relay, Jumps and Subroutines</p> <p>2) Develop Ladder Program for relay based motor control automation such that the motor reverses its direction when the limit switches are activated</p> <p>3) Develop a PLC ladder diagram to construct an alarm system which operates as follows.</p> <ul style="list-style-type: none"> - If one input is ON nothing happens. - If any two inputs are ON, a red light goes ON. - If any three inputs are ON, an alarm sirens sound. - If all are ON, the fire department is notified. 	Ref Table 1	<ul style="list-style-type: none"> • Execute the Ladder Program for relay based motor control automation such that the motor reverses its direction when the limit switches are activated and also Demonstrate by interfacing with PLC • Simulate the PLC ladder diagram developed for an alarm system and also Demonstrate by interfacing with PLC
8	03	02	<p>1 & 2) Develop PLC program for the following application</p> <p>a) Traffic Light</p> <p>3) Develop PLC program for the following application</p> <p>b) Water Level Indicator</p>	Ref Table 1	<p>Execute a PLC program for the following applications</p> <p>i) Traffic light controlling</p> <p>ii) Water level controlling</p>
9	03	02	<p>1 & 2) Develop automatic door system using optical sensor and linear actuator</p> <p>3) Develop Automatic Elevator control</p>	Ref Table 1	<ul style="list-style-type: none"> • Execute automatic door system using optical sensor and linear actuator • Design ladder diagram for an Automatic Elevator control Also, Test and simulate the ladder diagram designed to operate and control the

					Automatic Elevator control
10	03	02	<p>1 & 2) Design ladder diagram for car parking. (Hint: car is to be detected and enter the parking space to a particular location if space is available. If there is no space, a lamp should indicate that parking is full)</p> <p>3) Design ladder diagram for operating and controlling the Lift.</p>	Ref Table 1	<ul style="list-style-type: none"> • Simulate a ladder diagram for car parking. • Test and simulate a ladder diagram designed to operate and control the Lift
11	02	02,07	<p>1) Embedded System- Block Diagram of Embedded System</p> <p>2) Applications of Embedded System</p> <ul style="list-style-type: none"> • Robotics Drones • Braking System • Air conditioning, Refrigerator • Engine control System, <p>3) Applications of Embedded System</p> <ul style="list-style-type: none"> • Automatic Washing machine • Microwave Oven • Keyless entry in Automobiles. 		<p>You tube Presentation on Applications of Embedded System</p>
12	04	01,07	<p>1) Concepts on Distributed control System,</p> <p>2) Concepts on HMI</p> <p>3) Introductions to SCADA</p>	<p>Study the latest technological changes in this course and present the impact of these changes on industry</p>	<ul style="list-style-type: none"> • Multi media Exposure to DCS system • Demonstrate the HMI interface to control Light in AND/OR Logic
13	04	01,07	<p>1) Typical SCADA block diagram,</p> <p>2) Benefits of SCADA,</p> <p>3) Applications of SCADA</p>		<ul style="list-style-type: none"> • Multi media Exposure to SCADA system OR • Make case study visiting any nearby industry (Packaging/Milk Dairy/Processing) using HMI, SCADA/DCS systems.

- **Course Co-Ordinator must prepare PO - CO mapping with strength (Low/Medium/High) before course planning**

Table 1: Suggestive Activities for Tutorials: (The List is only shared as an Example and not inclusive of all possible activities of the course. Student and Faculty are encouraged to choose activities that are relevant to the topic and on the availability of such resources at their institution)

Sl.No.	Suggestive Activities for Tutorials
01	Write a PLC Ladder Program to Switching on/off the Lamp whether they are at the bottom or the top of the staircase.
02	The production line may be powered off accidentally or turned off for noon break. The program is to control the counter to retain the counted number and resume counting after the power is turned ON again. When the daily production reaches 500, the target completed indicator will be ON to remind the operator for keeping a record. Press the Clear button to clear the history records. The counter will start counting from 0 again. Write a PLC Ladder Program to perform this operation.
03	Write a PLC Ladder Program Providing lubricant for the gear box before the lathe spindle starts to run which aims to ensure that the oil pump motor starts first and the main motor starts subsequently.
04	Write a PLC Ladder Program such that Once the photoelectric sensor detects 10 products, the robotic arm will begin to pack up. When the action is completed, the robotic arm and the counter will be reset.
05	Develop PLC Programming Examples on Industrial Automation according to the logic given below, <ul style="list-style-type: none"> • A Saw, Fan and oil pump all go ON when a start button is pressed. • If the saw has operated less than 20s, the oil pump should go off when the saw is turned off and the fan is to run for an additional 5s after the shutdown of the saw. • If the saw has operated for more than 20s, the fan should remain on until reset by a separate fan reset button and the oil pump should remain on for an additional 10 s after the saw is turned off.
06	Develop and Simulate a PLC Ladder Diagram for Bottle Filling Plant
07	Study and present a Report on home Automation
08	Study and present a Report on Embedded systems in Automation
09	Study and present a Report on Automation in Processing Industries

Programme	Audit Course	Semester	IV
Course Code	20ME45T	Type of Course	Audit
Course Name	Indian Constitution	Contact Hours	2 hours/week 26 hours/semester
Teaching Scheme	L:T:P :: 2:0:0	Credits	2
CIE Marks	50	SEE Marks	Nil

1. Course Outcomes: At the end of the Course, the student will be able to:

CO-01	CO1	Understand Preamble, salient features and importance of Indian Constitution.
CO-02	CO2	Understand Fundamental rights, duties and Directive principles of state policy.
CO-03	CO3	Understand Parliamentary system of governance, Structure, Functions, Power of Central, state governments (Legislative, Executive) and Judiciary.
CO-04	CO4	Understand Panchayat Raj Institutions and Local self-governments, UPSC, KPSC, NHRC, Status of women, RTE etc.

2. Course Content

Week	CO	Detailed Course Content	Contact Hours
1	1	Introduction to constitution of India-Formation and Composition of the Constituent Assembly-Salient features of the Constitution-Preamble to the Indian Constitution	2
2	1,2	Fundamental Rights- Definition, The right to equality, The right to freedom, The right against exploitation, The right to freedom of religion.	2
3	1,2	Cultural and educational rights and The right to constitutional remedies. Fundamental Duties, Directive principles of state policy.	2
4	1,3	Parliamentary system of governance- Structure of Parliament- Lok Sabha and Rajya Sabha. Functions of parliament- Legislative, Executive, Financial Function Powers of Lok Sabha and Rajya Sabha.	2
5	1,3	Procedure followed in parliament in making law, Annual financial statement (Budget) – procedure in parliament with respect to estimates, Appropriation bill, Supplementary, additional grants, Vote on account, votes on credit and exception grant, special provisions, rules of procedure.	2
6	1,3	Structure of union executive, Power and position of President. Vice President, Prime minister and council of ministers.	2
7	1,3	Structure of the judiciary: Jurisdiction and functions of Supreme Court, high court, and subordinate courts.	2
8	1,3	Federalism in the Indian constitution- Division of Powers: Union list, State list and concurrent list. Structure of state legislation, Legislative assembly and Legislative council.	2
9	1,3	Functions of state legislature, Structure of state executive-Powers and positions of Governor, Speaker, Deputy Speaker, Chief Minister and council of minister.	2
10	4	Local self-government- meaning-Three tier system, Village Panchayat-Taluk panchayat Zilla panchayat, Local bodies-Municipalities and Corporations, Bruhath Mahanagara Palike, Functions of Election commission, UPSC, KPSC.	2

11	4	Amendment of the constitution, Human Rights-Definition-constitutional provisions-right to life and liberty-Human Rights of Women-Discrimination against women steps that are to be taken to eliminate discrimination against women in Education, employment, health care, Economic and social life,	2
12	4	Status of Women in India - Women in rural areas, Constitutional Safeguards - Dowry Prohibition act 1961- Domestic violence act 2005- Sexual harassment at work place bill 2006. Human Rights of Children- Who is a child- list the Rights of the Child- Right to education, Protection of Children from Sexual Offences Act (POCSO)-2012-	2
13	1,4	National Human Rights Commission Constitution- Powers and function of the Commission-Employee rights- Provisions made, Contractual-Non contractual employee rights-Whistle blowing-definition-Aspects-Intellectual Property Rights (IPR)-Meaning-Need for protection- Briefly description of concept of patents, Copy right, Trademark	2
